

**Men's Breakfast**  
**Sat., Dec. 13<sup>th</sup> @ 7:00 AM**  
**First Baptist Church Arlington**  
**J.D. Mitchell, P.E., MBS**  
**Speaking on**  
**"God's Created Dinosaurs"**

People of all ages are interested in dinosaurs! Thousands of general interest dinosaur books have been written; most of them from the perspective of evolution and millions of years. Because many children are very interested in dinosaurs, they can be greatly influenced toward a particular worldview by not only the books, but the many movies and TV shows about dinosaurs. Adults can also be influenced in a similar manner.

Creation speaker **J.D. Mitchell** will present the biblical creationist view that dinosaurs were created by God on day six of the creation along with mankind and were buried in large numbers in the cataclysmic worldwide Genesis Flood. Some dinosaurs went onto the Ark with Noah and the other animals and were fairly commonly seen by humans for hundreds of years after the time of Christ before they mostly went extinct.

**Mr. Mitchell's** PowerPoint talk, "**God's Created Dinosaurs**," will be based in large part on his new dinosaur book, *Guidebook to North American Dinosaurs According to Created Kinds*. This book is the first to attempt to categorize dinosaurs according to their created kinds.

**J.D. Mitchell** is a registered professional engineer in Oregon and Washington and has a Bachelor of Science in Mechanical Engineering from the University of Washington. He has also completed his Master of Biblical Studies in Biblical Creation Apologetics from Master's Graduate School of Divinity. J.D. is Executive Director of the [Institute for Creation Science](#) of Oregon, and speaks and writes regarding the creation versus evolution controversy as a part of his Creation Science research ministry ([Creation Engineering Concepts](#)).

**FBCA Sunday School Hour: 9:00 AM, Dec. 14<sup>th</sup> and 21<sup>st</sup>**

**CMI** undertook a major offensive to take more ground in the battle to proclaim the truth of the Bible. The aim was to simply and concisely expose evolution's fatal weaknesses. It culminated in 2014 with the completion of a milestone book, and a DVD documentary, both called **Evolution's Achilles' Heels**.

Appropriately, the Achilles' heels of evolution are often in the very areas widely considered to be impregnable strongholds of this belief system. These areas are the topics systematically covered in both the book and documentary. They are **Natural Selection, Genetics and DNA, The Origin of Life, The Fossil Record, The Geologic Record, Radiometric Dating, Cosmology, and Ethics and Morality**.

Evolution theory has no answer to these weaknesses, once properly explained and understood. The **book** is like no other work that we are aware of, in that it is authored exclusively by **9 Ph.D. scientists**. The **documentary** involves even more PhD scientists, 15 in all, and features striking footage and brilliant computer animations. All of these scientists received their doctorates from similar, secular universities as their evolutionary counterparts. Each is a specialist in various relevant fields.

The book and DVD represent a direct, targeted demolition aimed at the very pillars of the foundational belief system underpinning our now-secular culture.
