Description: The **Law of Increasing Entropy** is one of the foundational scientific laws of the universe. Its principle profoundly affects all existence, but particularly living systems. Entropy is a concept that concerns the spontaneous *arrangement* of things—that is, the arrangement of *anything*. Atoms, photons, playing cards, marbles, informational data bits... nucleotides... *anything* in large numbers. The law says that when an arrangement is spontaneously random, “mixedupness” (disorder) must *always* increase. Indeed, the fact of increasing entropy attests to the arrow of time for any phenomenon. Everything gets more randomized over time, because more random is more probable than less random (in the absence of intelligent activity). What does this law have to do with evolution? Everything! It means that a scientific law has already falsified a theory that is wishfully hoping that random mutations can mysteriously conjure up fantastically improbable biological arrangements. Neo-Darwinism flies in the face of established science.

Speaker: **Mark Champneys**, non-scientist producer of *Evolution Demolition* and *Moment of Truth* videos, was born a 5th generation Mormon, the son of an LDS bishop. Now a believer, he is lay Evangelism Director with **Saints Alive** in Tacoma and is the King County Fair Ministry Coordinator for **Child Evangelism Fellowship** (CEF). Mark produced and directed the **Evolution Demolition** film. He has had the blessing of training dozens for evangelism, and by God’s grace, of leading hundreds to Jesus.

The **Apologetics Forum of Snohomish County (AFSC)** helps equip Christians in the defense of **The Faith** in the postmodern world in three related areas: 1) **Creation vs. Evolution**, 2) **Christian Apologetics**, and 3) **Biblical Worldview**. **AFSC** provides a local Forum for lectures and DVD programs by knowledgeable presenters on these topics.
