

Current Presentations by Dr. Don DeYoung

For Creation-oriented Audience:

1. The Age of the Earth

Contrasting views on earth history
Theological implications of deep time
Young earth evidences including carbon-14, fossils and rock formations

2. The Moon, Our Nearest Neighbor in Space

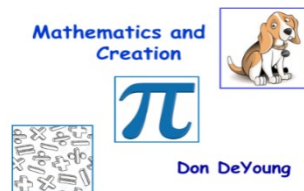

Natural moon origin theories
Evidences for the moon's recent supernatural creation
The moon's importance for our survival and well-being

3. Origin of the Physical Laws of Nature

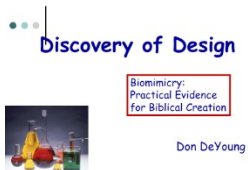

Examples of physical laws of nature
Failed efforts to explain the origin of physical laws
Are physical laws created...self-sustaining...permanent?

4. Mathematics and Creation

Math patterns found in nature
Mathematicians with a creation worldview
How math anticipates discoveries in nature

5. Discovery of Design

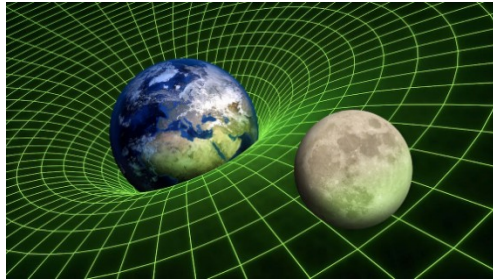

Practical ideas learned from nature including Velcro (feathers) and medical tests (horseshoe crabs).
Design examples from flight, water life, land animals, people and plants

6. Questions and Answers on the Bible and Science

What is Biblical creation?
How long were the Days of Creation?
Does evolution occur?
Did cavemen exist?
Is climate change real?
What do we learn from carbon-14 dating?
Was there a big bang?
Do aliens exist?

7. Exploring Gravity

Isaac Newton and gravity
Gravity and creation
Gravitons and gravity waves
Continuing mysteries of gravity

8. Lessons from Space

Five conclusions from the Space Age
Planet earth is unique
The universe begins with supernatural creation
The universe operates by physical laws
Space is beyond measure in size
The universe is wearing out

Sunday Messages:

1. The Genesis Flood

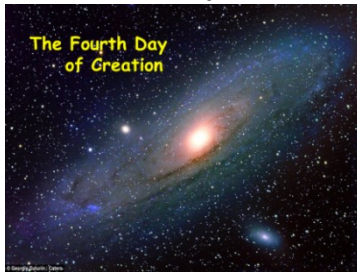

The importance of the Flood story
The Ark and its passengers
Sources of the Flood waters
Physical evidence of the Flood

2. Col 1:15-17

Title: Three Creation Truths from Colossians 1:15-17
The creation is by (origin), for (purpose) and in (sustainer) Christ
Illustrated with science examples.

3. The Fourth Day

Analysis of Genesis 1:16

Illustrated descriptions of the sun, moon and stars

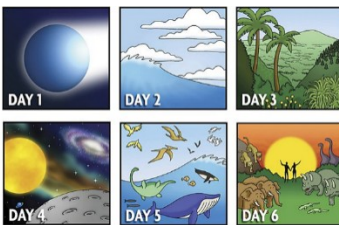

4. Noah, a Man of Faith

The life of Noah before, during and following the Flood
Selected texts from Genesis 6-9

For Grades K-12

1. A Science Walk through the Creation Week

Creation events for each day

Light, Weather, Land, Life, Space, Adam & Eve

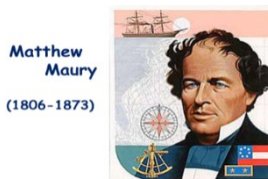

Illustrated with science demonstrations

2. The Case for Creation

Creation & evolution worldviews are contrasted in four ways:
Origins, Biological change, Design, and Earth's timescale

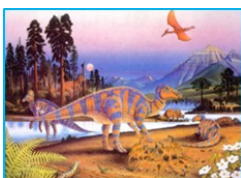

3. Matthew Maury, Pathfinder of the Seas

Biography of U.S. naval officer Matthew Maury

Called the "Pathfinder of the Seas" based on Psalm 8:8

4. All about Dinosaurs

Creation of dinosaurs

Their varieties, design, behavior and extinction.

Dinosaur references in Scripture
