

Main Service:**Design, Deluge & Dilemma**

- Widespread apostasy in young people—not because of lack of evidence, but lack of *dissemination* of the evidence.
- Jesus as Creator, as well as Kinsman-Redeemer, meaning that He must be our blood relative. This means that all humanity must come from Adam, also the ancestor of Jesus, the Last Adam. Adam's sin brought death, so Jesus brought Resurrection—Rom. 5 and 1 Cor. 15 make an explicit connection.
- Since death came through sin, fossil record must post-date Adam. Explained by Genesis global Flood, which has other evidences.
- Design in nature, including micro-machines. Coded information stored on DNA.
- Goo-to-you evolution requires information increase, but what we see are sorting out already-existing information, natural selection culling information, and mutations corrupting information.

Sunday School or secondary services:**Jurassic Reality: Dinosaurs and most asked questions** (includes open Q&A time)

People of all ages are captivated by dinosaurs. Unfortunately, evolutionists use dinosaurs to indoctrinate the young and the old with an earth history that includes millions of years but has no room for the Bible. This presentation will show the power of a person's starting assumptions (or "worldview") when interpreting past events, and will define the different types of sciences used in investigating the world around us, with a thorough exploration of these enigmatic lizards. Let's take dinosaurs to the Bible and see what God's word has to say about them!

Is Genesis a Literal History? Refuting Compromise from the Scripture

A six day, young earth understanding of Genesis is the only one that comes from the text itself, which is why the rest of Scripture interprets it that way. Long-age views are a modern aberration that comes from imposing outside ideas of uniformitarian "science" upon the text. See how compromising views render the Bible meaningless to a dying world. You'll be encouraged and energized to hear there is no need for compromise and that there are answers. The evidence for Creation and the Bible's account of history is all around us if only we know how to look for it, and Jonathan will show you how to do *just that!*

Second service or second visit to church:

Origin of life: fatal flaws of chemical evolution (New content)

Evolutionary dogma states that life arose coming from non-living chemicals. However, the more we learn about the complexity of even a 'simple' cell, the harder this is to accept. Modern science has shown that all cells contain many tiny machines and other nanotechnology, and the world's most complex information processing systems. Further, real, observational chemistry works in the opposite direction from the chemical evolution conjecture. foundation. And if life can't start naturalistically, then Darwinian evolution is dead on arrival.

The Genesis Flood: biblical realism and scientific models (New content)

The Flood during Noah's day is vital to understand the history of our planet. This talk explains why in detail, and answers many common questions. For example: Does the Bible teach a global or local Flood? How does science fit in? What models are right, and what should be rejected? What are the main evidences in the rocks and fossils that the globe was totally covered? Why did lifespans drop sharply after the Flood?

Biological Robotics: incredible design in life

We can tell when something shows evidence of having a human designer. So when things in nature show those same characteristics—only on a much more complex level—it makes sense to attribute that to a Designer as well. Jonathan discusses several evidences of magnificent design in nature, including DNA, molecular machines, the complexity of the cell, and more. He also demolishes arguments of 'bad design'.

Is Genesis a Literal History? Refuting Compromise from the Scripture (if not given in SS hour)

A six day, young earth understanding of Genesis is the only one that comes from the text itself, which is why the rest of Scripture interprets it that way. Long-age views are a modern aberration that comes from imposing outside ideas of uniformitarian "science" upon the text. See how compromising views render the Bible meaningless to a dying world. You'll be encouraged and energized to hear there is no need for compromise and that there are answers. The evidence for Creation and the Bible's account of history is all around us if only we know how to look for it, and Jonathan will show you how to do *just that!*

Public meeting: (where non-church people expected)

The Christian Roots of Science & busting evolutionary myths

Why did science flourish in the West, and only the West? The biblical worldview provided the presuppositions that allowed science to flourish while it was stillborn in other places such as Greece and China. Evolutionists deny this biblical foundation for science by accusing Christianity of superstitions that held science back. Jonathan deftly busts the myth of the 'Dark Ages'—a time marked by many scientific advances. He also busts the myths of Galileo, belief in a flat earth, and more.

Other Specialty Talks:

Biological Robotics: incredible design in life

We can tell when something shows evidence of having a human designer. So when things in nature show those same characteristics—only on a much more complex level—it makes sense to attribute that to a Designer as well. Jonathan discusses several evidences of magnificent design in nature, including DNA, molecular machines, the complexity of the cell, and more. He also demolishes arguments of 'bad design'.

Bioethics: issues of life, death, and morality (Updated content)

The right view of Genesis Creation enables us to think clearly about 'life' issues such as abortion, euthanasia, cloning, animal rights, stem cells, etc. Conversely, consistent evolutionary thinking undermines the biblical sanctity of innocent human life, as in Nazi Germany.

Christianity for Skeptics: Refuting the New Atheists

Despite their assertive confidence, their arguments are vulnerable. See how atheism logically leads to a denial of reason and objective right and wrong. Learn to avoid some common fallacies.

Are Miracles Scientific?

Why should we trust the biblical reports of miracles? Are miracles a threat to science? Can an atheist even defend the natural law that he uses to attack miracles? Join Dr. Sarfati to learn how to process and explain biblical miracles to your congregation.

Jesus in the Old Testament: Messianic prophecies

- First some brief items on the day and year of Jesus' birth.

- Jesus as Creator, as well as the divine Memra or Word of God. OT proves the deity of the Messiah.
- The Kenosis: Jesus emptied himself, NOT by removing His divine attributes (despite what BioLogos claims), but by *adding* human ones. He laid aside the independent exercise of His divine power, submitting to the Father's will, for the duration of His earthly life and ministry.
- Jesus had to be human to take on the same nature as the ones He died for, and to be our Kinsman-Redeemer via common descent from Adam.
- First prophecies in Genesis 3:15, related to Gen. 4:1–2, Isaiah 7:14.
- How the Wise Men knew: they knew of the prophecies of Balaam and Daniel (timing of the Messiah's arrival) but not Micah (place of birth).

Chess challenge

[blindfold takes too long and is too tiring; 20 players sighted is fine]
